## Director's Notes

“Ageism can be seen as a process of systematic stereotyping of and discrimination against people because they are old, just as racism and sexism accomplish this with skin color and gender. Old people are categorized as senile, rigid in thought and manner, old-fashioned in morality and skills....” So wrote Robert N. Butler, MD, creator of the term ageism, in his 1975 Pulitzer Prize winning book, *Why Survive? Being Old in America*. Sadly the field of gerontology and geriatrics lost this leading advocate for the dignified treatment of older adults on July 4, 2010.

Dr. Butler dedicated his professional career to challenging lawmakers, scientists, medical students and other healthcare providers to create systems of care and support in which older Americans can age gracefully. He was the first director of the National Institute on Aging and established one of the nation's first geriatrics departments associated with a medical school at Mount Sinai in New York City. At the time of his death, he was the president and chief executive of the International Longevity Center, USA, an organization focused on healthy aging, productive engagement and combating ageism and converting our life extension into more opportunity for a productive and equitable aging society. Their website -- <http://www.ilcusa.org/> -- is a rich resource of information on these concerns.

To see an example of how to support a productive and equitable aging society, check out the replication effort of the Coming of Age program developed in Philadelphia by Temple University. The San Francisco Bay Area counties of

Alameda and San Francisco, where the largest percentage of our retirees reside, just launched a version of this program. Go to [www.ComingofAge.org/BayArea](http://www.ComingofAge.org/BayArea) to learn more about their inspiring opportunities.

## Spotlight

### EMERITI AND RETIREES OF DISTINCTION

#### Donald A. (Al) Riley– Distinguished Emeritus

*Photo: Carolyn Serrao*

Professor Emeritus Donald A. Riley (Al) is one of the founding fathers of the UCB Retirement Center. Some years ago, he, in a group led by Professor Robert Connick,

with Professors Adrian Kragen and Sheldon Messinger, approached Chancellor Tien on the matter, emphasizing that such a center would benefit the whole university community as well retirees. In spite of the usual complaints of lack of money, the Retirement Center later materialized.

This 88-year-old energetic emeritus professor is better known as having been the guiding spirit and skillful administrator responsible for the great success of the Learning in Retirement program that he and the late Emeritus Professor Mel Webber launched in 2000. He and Professor Webber correctly judged that the Berkeley faculty was a great resource that could be tapped for the enlightenment of retirees if approached with the hypothesis that almost every professor is willing to give a single lecture on the subject of his specialty. An astute early decision that there would be no stipend paid to lecturers, and no fees required of the audience of retirees has attracted both listeners and speakers. Much of the program's success is due to Professor Riley's friendly, persuasive approach to his Berkeley colleagues, making them aware of the receptive audience of retirees on the Berkeley campus.

Professor Riley's distinguished research and teaching career in the Department of Psychology has focused on animal cognition. Although he formally retired from the University in 1991, his research, publication and

guidance of graduate students has continued as have honors from his peers. In 1992 he was awarded the Berkeley Citation; in 2004 he was the Alumnus of the year, Ohio State University Department of Psychology; and this year he received the Comparative Cognition Society Research Award, and gave its keynote lecture.

Not only a long-time faculty member and Department Chair, he served four years as Associate Vice-Chancellor for Academic Development, giving him an intimate knowledge of campus administration. Al has given tirelessly of his time and his expertise in the service of retirees and emeriti since his own retirement in 1991. He served two terms as president of the Berkeley Emeriti Association, and today continues to serve on the Policy Board of the Retirement Center.

Professor Riley is a bird watcher, a former folkboat sailor (that's a classy wooden sloop), and contributes his strong baritone voice to the Faculty Club Monks. An informed traveler, he and his wife Carolyn have recently returned from a trip to Turkey.

Professor Riley is almost certainly familiar to those retirees who have attended Learning in Retirement courses. He attends all lectures himself and makes many of the introductions in which, with good humor, he communicates to both speaker and audience his lively interest in the subject. During the discussion he can always be counted on to ask a penetrating question or two.

Staff retirees, emeriti and the campus community have benefited greatly from Professor Riley's engagement in their affairs, including having been at the creation of the Retirement Center itself, and for launching and managing Learning in Retirement, one of its most successful programs. We are all in your debt, Al. Thank you!

## POST-EMPLOYMENT BENEFITS UPDATE

### Task Force Releases Recommendations

As the month of August came to a close, major announcements were made regarding Post-Employment Benefits. After more than a year of deliberation, the Task Force presented its recommendations to President Yudof.

In summary, the Task Force recommends that UC:

- Increase employer and employee contributions to the UC Retirement Plan (UCRP) to 10 and 5 percent, respectively, by July 2012.
- Add a new UCRP pension tier for employees who join UC after July 2013. Several options are proposed, but all raise the minimum retirement age and require longer length of service to receive the maximum pension benefit.
- Change eligibility rules for retiree health benefits.
- Reduce UC contributions to retiree health insurance premiums.

Current retirees' monthly retirement benefit will not be reduced, and they will not be asked to contribute to UCRP.

You can find detailed information about current UC Retirement Pension benefits and the proposed changes at <http://universityofcalifornia.edu/sites/ucrfuture/news-updates/task-force-issues-its-recommendations/>

**Online Town Hall Meeting:** On September 29, 2010, 2pm, UC leaders will host an online town hall meeting to talk with the UC community. Panelists will include Nathan Brostrom, executive vice president for business operations; Dwaine Duckett, vice president for human resources; and provost Lawrence Pitts, executive vice president for academic affairs.

The meeting will be webcast at: <http://www.ustream.tv/ucevents>. No log-in is necessary to view the event.
